Portable Starting Unit Earth Gear Model 2300QC

Patent Pending

[Email this page](#)

Earth Gear Model 2300QC

- 26 AMP hours @ 10 Hour Rate
- 2300 AMPS Peak Current
- Available with separate trolley
- 19.2"x7.5"x11.5"
- 69 LBS. Complete
- Not to be used as an aircraft battery charger.

All in one portable Start Pac® Earth Gear Model 2300QC manufactured with built in chargers and cables equipped with 800 Amp alligator clips.

Earth Gear units are 24/26 VDC output with universal chargers that will accept 90 - 240 VAC 50/60 hertz.

NOTE: When storing this portable battery pack for more than 30 days, remove the battery box from the charging unit and store separately.

The new patent pending Start Pac® Earth Gear Model 2300QC has a separate removable battery box that can be changed in 10 seconds. This feature allows the user to change batteries in the field without needing to send the Start Pac® back to the shop or Manufacturer.

The Earth Gear Model 2300QC is capable of starting 24 Volt Gas and most very large Diesel powered mining and construction equipment. The Earth Gear unit has dual redundant 4 Amp chargers and recharge time is 3 1/2 hours if the batteries are completely depleted (we do not recommend total battery discharge, to extend battery life, recharge after each start if possible). Our batteries are recombinant non-hazardous rated sealed dry-cell type and can be safely operated in any position or environment without hesitation.

Certified

CE marked if purchased through [Airpart UK](#)
