### Model Li2800 QC

28 AMP hours @ 10 Hour Rate  
 2400 AMPS Peak Current  
 L 19.2" x W 7.5" x H 9.75"  
 46 LBS. Complete  
 Not to be used as an aircraft battery  
 charger.

This compact portable Lithium Ion starting unit is a full 28VDC battery pack and will provide superior starts on all electrically-started turbine engines. It has dual, redundant chargers with a total of 7 amps output and a recharge time of approximately 4 hours.

The all new Start Pac® Model Li2800 QC utilizes the latest technology in Lithium batteries. These batteries provide the same power as the lead-acid type but are 42% lighter and 32% smaller. In addition, lithium batteries have two other major advantages:

- Twice the battery life of lead-acid batteries
- No sulfation problems (can be left in a discharged state without causing damage)

### PLEASE NOTE:

Lithium ion batteries can be damaged by deep discharges. Do not run the batteries down below 23 volts, a spike during a start is okay. Voltages below 23 begin the damage to the batteries. At 18 volts, the batteries will be damaged beyond repair.

Batteries have no memory effect and can be recharged at anytime.  
 Made in the USA.

Certified

CE marked if purchased through [Airpart UK](#)
