Portable Starting Unit Model Li2800QC Twin Pac

28.5 VDC
Patent Pending

Model Li2800 QC Twin Pac

56 AMP hours @ 10 hour Rate
 4800 AMPS Peak Current
 L 19.2" x W 7.5" x H 9.75" each unit,
 Twin Pac trolley L 19" x W 23" x H 12"
 not including removable handles
 109 LBS. Complete with Twin Pac
 Trolley, 46 LBS. complete for each
 unit when separated.
 Not to be used as an aircraft battery
 charger.

This powerfully versatile Lithium Ion Twin Pac starting unit is a full 28VDC battery pack and will provide superior starts on all electrically-started turbine engines. It has dual, redundant chargers with a total of 7 amps output and a recharge time of approximately 4 hours.

The all new Start Pac Model Li2800 QC Twin Pac utilizes the latest technology in Lithium Batteries. These batteries provide the same power as the lead-acid type but are 42% lighter and 32% smaller. The multi-purpose Li2800QC Twin Pac can be easily broken down into 2 separate units for easy transport and shipping.

Twice the battery life of lead-acid batteries
 No sulfation problems (can be left in a discharged state without causing damage)

PLEASE NOTE:

Lithium ion batteries can be damaged by deep discharges. Do not run the batteries down below 23 volts, a spike during a start is okay. Voltages below 23 begin the damage to the batteries. At 18 volts, the batteries will be damaged beyond repair.

Batteries have no memory effect and can be recharged at anytime.
 Made in the USA.

CE marked if purchased through [Airpart UK](#)
