

For engine starting only

Ideal for jump starting aircraft, tank and military truck engines, this 24V All-In-One air portable/carry-on START PAC® with built-in chargers, power plug and cables is specifically designed for engine starting only.

This portable starting unit is one of our most popular for ground use at home or in the field; it will start turbine or piston engines with up to 1500 horsepower. Versatile and dependable, this 24 volt Twin Pac can be used as a single unit or separated into two complete units that can easily be carried on board different aircraft. This Twin Pac comes with its own trolley and “Y” connector included and its environmentally responsible, low VOC powder coating protects the case from wear, tear and poor weather conditions.

Please note that the 2300QC Twin Pac is not to be used as an aircraft battery charger.

SPECIFICATIONS	
Battery type	Lead acid
Voltage	24 VDC
Peak Current	3500 A
Capacity @10 Amp Rate	56 Ah
Complete Weight	113lbs / 51kg
Dimensions - Length x Width x Height	52" x 23" x 23.5" 132 x 58 x 60 cm
Charger type	Built in
Float type charger input	90-240 VAC 50/60 hertz
Charging time range	30 minutes to 3 hours

PRODUCT FEATURES

- Versatile and lightweight
- Air portable/carry on START PAC® for whenever power is needed
- Complete all-in-one unit is supplied with built-in universal smart float type chargers for faster recharge, power plug, Twin Pac trolley, “Y” connector and 7ft/2.1m aircraft cables
- Integrated LED charge indicator
- Cold resistant, valve regulated high amperage output lead acid batteries
- Powerful, sealed cells non-hazardous battery pack, can be used in any position. Maintenance free.
- Non toxic, non spillable and recyclable batteries.
- Resistant aluminum case with environment friendly, low VOC durable powder coat finish
- Easy to handle, built for heavy duty usage
- Patented Quick Change design : less than one minute battery change for easy replacement
